A Mean score of 13 gene-set programs by myeloid population
Resident state
cDC2
Inflammatory state
Lipid-associated state
Mature/migratory DC
cDC1
Langerhans cell
pDC
Proliferating myeloid
z-scored program score
2
1
0
−1
−2
Resident/tissue
Lipid-associated
Inflammatory monocyte
Classical activation (M1 gene set)
Alternative activation (M2 gene set)
Angiogenic
Efferocytotic
Antigen presentation
Complement
Interferon-stimulated
Matrix remodeling
Proliferating
Phagocytic/lysosomal
B Per-cell M1 and M2 gene-set scores (3,141 cells)
M2 gene-set score
M1 gene-set score
Healing
Non-healing
C Library-level program scores (mean and 95% CI)
program score (library mean)
Resident adj. P = 0.39
Inflamm. adj. P = 0.14
Complement adj. P = 0.51
Lipid-assoc. adj. P = 0.08
Healing
Non-healing
